

# Lactose Pellets

**Lactose Pellets** are the most popular and traditional delivery form for homeopathic medicine. They are hard, round, edible spheres made of sucrose and lactose. The homeopathic active ingredient is infused into the lactose and sucrose pellet base which has a mild sweet taste. Homeopathic pellets are taken sublingually and allowed to dissolve for optimal absorption and utilization.

Paulaur Lactose Pellets are manufactured in Cranbury, NJ and offered in the sizes and packaging options below.

<b>INGREDIENTS:</b>
